Dear Mr. Visin,

Thank you for taking my class and I on a tour at the sewage treatment plant. I liked learning about how you use the waste to fertilize soil, how some bacteria eats other bacteria, and how you clean the sewage. Thank you for teaching us how a sewage treatment plant works. I learned a lot.

Sincerely,
Jessica Cummings
Grade 6

Dear Mr. Visin,

First of all, I want to thank you for giving us a tour of ReWa. I learned many things and here are three of them: 1. The average four-person family uses 300 gallons of water in one day, 2. It only takes sixteen hours for dirty, sewage water to enter the plant, get cleaned, and get shipped back to receiving streams, 3. Water is cleaned sixteen times in different towns starting from ReWa before entering the ocean. I had a blast and appreciated how you and your fellow employees took the time to teach our class about cleaning water. Thanks!

Sincerely,
Jed Vick
