Renewable Water Resources Participates in Greenville Greenbuild 2009

Greenville, S.C. (July ##, 2009) – Renewable Water Resources (ReWa) recently supported Greenville Greenbuild, the 2009 HBASC Convention, as the First Time Attendee Sponsor. The event offered a green building series, including topics on NAHB Green Building, EarthCraft and LEED design.

ReWa supported the Greenbuild to help increase awareness of building trends designed to protect our community's resources. In October 2008, ReWa announced the grand opening of its new sustainable Administration Building, and is currently pursuing Green LEED Certification. ReWa's building hosts many environmentally-friendly features, such as low-flow toilets and effluent irrigation system.

To learn more about ReWa's sustainable building features, visit www.rewaonline.org and check out the "Building Green for the Future."

Renewable Water Resources (ReWa)

ReWa's goal is to promote a cleaner environment, and to protect the public health and water quality of the Upstate waterways, while providing and developing the necessary sewer infrastructure for the growing economy. ReWa serves more than 400,000 industrial, commercial and residential customers in Greenville County and parts of Anderson, Spartanburg, Pickens and Laurens Counties.
