**Renewable Water Resources Hosts OLLI @ Furman for Educational Tour**

Greenville, S.C. (December 9, 2009) – Renewable Water Resources (ReWa) recently hosted a group of 13 participants from the Osher Lifelong Learning Institute (OLLI) group at Furman. OLLI toured ReWa’s sustainable administration building to learn more about its environmental stewardship efforts.

Customer Service Manager Stacey Green, along with Hillary Anden from McMillan Pazdan Smith Architecture, guided the group through the green building features of the facility, as well as ReWa’s general operations. The facility includes sustainable features, such as low-flow toilets, recycled content materials and low exterior lighting. ReWa is currently awaiting LEED Certification.

ReWa regularly offers facility and plant tours as part of its public education program. The tours are designed to increase the community’s awareness about ReWa’s services and how the community can participate in protecting our area’s valuable aquatic resources. Tours are provided for local groups and/or individuals and topics can be tailored to fit the need of the group.
