REWA (Renewable Water Resources) Reveals New Sustainable Building

Greenville, S.C. (October 30, 2008) – **ReWa (Renewable Water Resources)**, formerly Western Carolina Regional Sewer Authority, announces the completion of its new environmentally-conscious and sustainable Administrative Building.

ReWa celebrated the completion with an open house for community members to tour the facility, highlighting the numerous environmental features. The improvement project replaced **ReWa**'s other aged and maintenance-intensive buildings with a new, energy-efficient facility.

Coupled with a new organizational identity, the new environmentally-sustainable Administrative Building raises the level of awareness for both **ReWa** employees and customers, and serves as a testament to the organization's dedication to environmental stewardship.

ReWa worked diligently in collaboration with architects from Pazdan-Smith Group to strategically plan and execute numerous green-building techniques, as listed in the detailed attachment. Pursuing LEED Certification with numerous strategic environmental features, the building allows **ReWa** to exemplify responsible consumption of resources.

For more information, visit www.ReWaOnline.org.

ReWa (Renewable Water Resources)

ReWa's goal is to promote a cleaner environment, and to protect the public health and water quality of the Upstate waterways, while providing and developing the necessary sewer infrastructure for the growing economy. ReWa serves more than 400,000 industrial, commercial and residential customers in Greenville County and parts of Anderson, Spartanburg, Pickens and Laurens Counties.
